

## Overview

---

Is China's 1GW floating solar PV project a 'first and largest'?

Image: CHN Energy. State-owned China Energy Investment Corporation (CHN Energy) has completed a 1GW floating solar PV facility in the Shandong Province of China. In a statement released on Wednesday (13 November), CHN Energy said it had successfully connected the project to the grid, claiming it is the “first and largest of its kind in the world”.

Where is the floating solar PV project located?

The floating solar PV project is located in the Shandong Province of China. Image: CHN Energy. State-owned China Energy Investment Corporation (CHN Energy) has completed a 1GW floating solar PV facility in the Shandong Province of China.

Where is a 100MW solar system being built?

The project in Turna, Xinjiang, China. Image: Lan Shengwen, a reporter from Gaochang District Media Center. A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and grid-connected by the end of the year, part of a project which has also deployed conventional solar PV.

Will China increase its installed capacity of floating solar PV?

Domestically, China is also looking to increase its installed capacity of floating solar PV. Yet another arm of China Energy, CGN New Energy Holdings, commissioned a 400MW offshore solar PV project in August 2024.

Is floating solar PV a good idea?

Floating solar PV continues to attract international attention. Last year, China Energy Engineering Corporation, another arm of China Energy, proposed building another 1GW floating solar PV installation in Zimbabwe.

When will a 100MW solar & molten salt energy storage system be completed?

A 100MW thermal solar and molten salt energy storage system in Xinjiang, China, is set to be completed and grid-connected by the end of 2024.

## 1gw photovoltaic energy storage project
