500V lithium battery energy storage system

Overview

What is a 50kw-300kw lithium energy storage system?

A 50KW-300KW lithium energy storage system consists of 48-volt modules with capacities ranging from 100Ah to 400Ah. These systems can be paralleled up to 14 units if a larger battery storage system is required.

What voltages are available for a battery energy storage system?

All system systems are offered with either 400VAC or 480VAC 3 phase interconnect voltages. Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO₄) battery packs connected in high voltage DC configurations.

What are the features of high voltage lithium battery system?

1. 500V 150kWh high voltage lithium battery system, works with inverter, can connect with solar PV array, wind turbine and generator. 2. Key features of high voltage energy storage battery Support different powering source, such solar, wind and generator. Modular design with different density, suits all scenarios.

What is a p500e energy storage system?

The P500E has a modular design with a built-in STS and transformer. With the P500E, you can transfer energy bi-directionally to the battery, grid and DG, helping you to achieve more functionality and maximise the benefits of your energy storage system.

What is a Megatrons 500KW battery energy storage solution?

MEGATRONS 500kW Battery Energy Storage Solution is the ideal fit for commercial applications. Utilizing Tier 1 LFP battery cells, each commercial BESS is designed for a install friendly plug-and-play commissioning. Each system is constructed in a environmentally controlled container including fire suppression.

What is lithium iron phosphate (LiFePO₄)?

Each commercial and industrial battery energy storage system includes Lithium Iron Phosphate (LiFePO₄) battery packs connected in high voltage DC configurations. Battery Systems come with 5000 cycle warranty and up to 80% DOD (Depth of Discharge) @ 0.5 at 25°C.
