

## Solar Storage Container Solutions

# 500v energy storage battery

## Overview

---

How long should the battery be stored?

If the battery need be stored for a long time, the voltage should be at 50%SOC, and stored in the condition as storage proposal. It needs at least one charge & discharge cycle every six months. We warmly welcome OEM design inquiry!.

What are the features of high voltage lithium battery system?

1. 500V 150kWh high voltage lithium battery system, works with inverter, can connect with solar PV array, wind turbune and generator. 2. Key features of high voltage energy storage battery Support different powering source, such solar, wind and generator. Modular design with different density, suits all scenarios.

What makes a good energy storage company?

1. 20 years professional energy storage design and integration capabilities. 2. R&D, design and debugging professional technical team 3.Group corporate structure,Stable revenue capacity of 100 million, sufficient investment in R&D and technology funds 4.Complete QC, QMSystem, fast delivery capability.

Why should you choose Huijue battery-powered storage?

Huijue's lithium battery-powered storage offers top performance. Suitable for grids, commercial, & industrial use, our systems integrate seamlessly & optimize renewables. High-density, long-life, & smartly managed, they boost grid stability, energy efficiency, & reduce fossil fuel reliance.
