## Overview

---

Will Roscosmos install a GLONASS station in Venezuela?

In December 2022, the Russian space agency Roscosmos announced an agreement to install a GLONASS navigation system station in Venezuela, which is also analogous to the European Galileo and Chinese BeiDou systems. The station will enhance the capabilities of GLONASS both in the Western Hemisphere and globally, Roscosmos stated at the time.

How will the Russian GLONASS navigation system work in Venezuela?

It will allow Venezuelans to permanently and freely access data for land, maritime, and air transportation. On Wednesday, Nicolas Maduro announced the start of operations of the Russian GLONASS navigation system, which is analogous to the American GPS.

What is a Venezuelan GLONASS station?

The Venezuelan GLONASS station-operated by the Bolivarian Agency for Space Activities (ABAE) and Roscosmos-will enable civilian applications in precision agriculture, industrial monitoring, and transportation.
