Are battery cabinets divided by brand

Overview

What is a battery cabinet?

Battery cabinets are a convenient storage solution that encourages staff to maintain the correct handling and storage procedures. By charging and storing batteries in the one location, you are reducing the likelihood of batteries being lost, stolen, damaged or left in unsafe conditions (such as outdoors).

Are battery units rack-mounted or cabinet-mounted?

Based on the size, the batteries are rack-mounted if they are above 100 AH and used in cabinets if they are below that level. The number of battery units and the respective size of the battery determines rack or cabinet usage.

Are batteries locked in cabinets or arranged in access-protected rooms?

As per general principle batteries are locked in cabinets or arranged in racks that are housed in access-protected rooms. Only authorized and skilled technicians are accessible to batteries at all times. The risk posed by an open rack battery is lethal (High voltage or arc blast) and hence access should be restricted only to authorized personnel.

Should a battery unit be placed in a rack or cabinet?

The number of battery units and the respective size of the battery determines rack or cabinet usage. If the unit is heavy [above 50 pounds] then lifting that battery and placing it in a rack seems a humongous task and hence cabinets are preferred.

Why should you choose a custom battery cabinet design?

The unique selling point of a custom battery cabinet design is the flexibility it offers concerning simplicity in access. The neat arrangement of cables and grouping them or naming them as per their usage becomes naturally easy.

Why do we need a battery cabinet & rack?

Physical observation of a battery is key in the maintenance of batteries in string and in avoiding undue incidents. The battery cabinets and racks make this task easy by having an orderly arrangement of batteries. Concerning maintenance, the proactive approach reaps rich benefits over a reactive measure.
