## Overview

---

What does UL Solutions do for battery product manufacturers?

As a global leader in battery safety testing and certification, we help battery product manufacturers demonstrate product safety, quality and performance to gain accelerated access to the global market. UL Solutions provides advisory services that help integrate energy storage into renewable energy projects for clean, reliable energy generation.

Why do you need a Ce battery certification service?

To ensure that your battery products can smoothly enter the European market, we provide professional CE battery certification services. Whether you are a battery manufacturer, producer, importer, or distributor, we can offer comprehensive support to ensure your products comply with regulatory requirements.

How do I find a qualified product?

Search the Qualified Product database to find Qualified Products. Each Product is made public on the date requested by the Member company that submitted the Product for qualification. Search for a Qualified Product by Company Name, Product Name, or Model Number. By submitting a search query, you agree to the Bluetooth Website Terms of Use.

Are Ce battery certifications valid?

Certificates are valid only for products that have undergone verification. If you have any questions about CE battery certification or need further information about our services, please feel free to contact us at [test@cirs-group.com](mailto:test@cirs-group.com). CIRS Testing accepts no responsibility or liability whatsoever with regard to the information on this website.

What kind of tests does ul solutions offer for battery technology?

UL Solutions' services cover the energy storage industry's entire value chain.

We are a leader in safety testing and certification for battery technology. Our performance testing offerings include competitive benchmarking, charge/discharge and overcharge tests, as well as environmental and altitude simulation for system integrators.

How can a battery module & pack Testing Service help?

UL Solutions' battery module and pack testing services can evaluate compliance with battery testing safety standards and regulations. Our building inspections also help identify compliance gaps and guide improvements for proper operation of your life safety, fire safety, and security systems.
