Blown fuse in circuit breaker in Chicago

Overview

What happens if you blow a fuse or tripping a breaker?

Blowing a fuse or tripping a circuit breaker is a common issue, especially if you're a multitasker. If you overload a circuit, your system will cut off the electrical flow to prevent your wires from overheating and causing circuit damage or fire. Follow these steps to restore power and get all those appliances going again:.

What happens if a fuse is blown?

A blown fuse occurs when too much electrical current flows through the circuit, causing it to overheat and melt. This can happen due to an overload of appliances or faulty wiring. To replace a blown fuse, you will need to first locate the circuit breaker panel in your home.

Can a blown fuse damage a circuit breaker?

This will minimize any further damage that could be caused by a power surge. Once all electrical appliances connected to that particular circuit breaker have been turned off, it's time to assess the damage done by the blown fuse. Have any wires been damaged?

.

Can a blown fuse be switched back on?

Unlike a circuit breaker, a blown fuse can't be switched back on. To fix it, you will need to replace the fuse with one of the same amperage rating (more on this below). [Why Do Circuit Breakers Trip and Fuses Blow in the First Place?](#)

Have you ever heard the saying "too much of a good thing?"

" This is definitely the case with electricity.

What should I do if I blow a fuse?

The first thing to do when you blow a fuse is to identify which circuit breaker is faulty. Most homes will have their circuit breakers labeled according to the area of the house they serve – e.g. ‘kitchen, “garage’ etc. This will help narrow down exactly where the problem lies.

What happens if a faulty electrical appliance blows fuses?

Faulty electrical appliances can also trip circuits and blow fuses. This usually happens when an appliance has short circuits or there’s an issue with its wiring or internal parts. When this occurs, switching off all other appliances in order to reset the circuit should resolve this issue.
