

Solar Storage Container Solutions

Boston Smart Solar Systems

Overview

What is the Massachusetts smart solar program?

Through the MA SMART solar program, the state's three investor-owned utilities compensate solar owners for the electricity their systems produce. The program is one of several solar incentives available in Massachusetts that reduces the cost — and increases the savings — of installing a home solar system.

What is Boston Solar?

Boston Solar is the #1 residential solar company based in Massachusetts, with over 4,000 installations. They are proud to power Massachusetts, a state that continues to lead the nation in solar installations. Boston Solar provides superior products, exceptional customer service, and the highest quality workmanship.

Can a home solar system reduce energy costs in Massachusetts?

Massachusetts has other solar incentives that can reduce the cost of going solar and the state boasts the fourth-highest electricity prices in the nation. So, even without the SMART incentive, Bay Staters can substantially reduce their electricity costs and carbon footprint by installing a home solar system.

Does Boston Solar install solar?

From financing to design and installation, Boston Solar does it all. Our in-house installers are licensed and certified, meaning you can rest assured that your solar meets the most rigorous standards. Download the Boston Solar complete guide to going solar and get answers to all your questions about solar energy.

What is the solar Massachusetts renewable target (Smart) program?

The Solar Massachusetts Renewable Target (SMART) Program compensates homeowners for their solar electricity production. Here's how it works.

Does Massachusetts have a solar metering program?

Each utility supports a percentage of the program proportionate to the amount of electricity they distribute in the state. Massachusetts solar owners can participate in both net metering and SMART. However, SMART only applies to the value of solar electricity after net metering is applied. (We'll show how this works below).
