Can high-power energy storage batteries be transported by air

Overview

Not all battery types can be shipped by air. For example, lithium-ion batteries over a specific Watt-hour rating must be shipped by sea or road. Can a battery be transported by air?

Defective or waste batteries are forbidden for transport by air (Special Provision 154). Each cell or battery must be of the type proven to meet the requirements of UN Manual of Test and Criteria Part III Sub-Section 38.3. NO.

Can lithium ion batteries be transported by air?

Lithium metal or lithium ion batteries may be transported as cargo on passenger aircraft with exemption from States concerned under Special Provision A201. Other consideration: Defective or waste batteries are forbidden for transport by air (Special Provision 154).

Can a lithium battery be transported on a cargo aircraft?

A88. Batteries having a mass exceeding 35kg may be transported on cargo aircraft with prior approval from State of Origin under Special Provision A99. Lithium metal or lithium ion batteries may be transported as cargo on passenger aircraft with exemption from States concerned under Special Provision A201.

Can I ship lithium batteries by airmail?

You will need to contact your local postal authority to see if you be able to ship them by surface methods i.e. sea, road and rail. If you have to send the lithium batteries by air, then you will need to send them with a freight company.
