China 500 watt solar inverter in Lithuania

Overview

Does Lithuania block Chinese manufacturers from remotely accessing solar power plants?

Lithuania's parliament Image: BigHead, Wikimedia Commons The Lithuanian parliament has passed legislation blocking Chinese manufacturers from remotely accessing the country's solar, wind, and storage facilities.

Can Chinese manufacturers access a power supply in Lithuania?

With China included on the list, the law prohibits Chinese manufacturers from accessing systems they supply in Lithuania, preventing them from remotely managing power parameters or turning devices on or off.

Can Lithuania map out PV manufacturing to 2030?

The goal is simple: to map out PV manufacturing out to 2030 and beyond. Lithuania passed legislation to limit the ability of Chinese inverter manufacturers to remotely access the country's solar plants.

When will Lithuanian power plants be able to run a 100kW power plant?

From 1 May 2025, operators of new Lithuanian power plants over 100kW in capacity will have to ensure that additional safeguards are in place for the information management systems and inverters at their sites. Existing sites will have to meet the requirements by 1 May 2026.

Will Lithuania install a solar PV system by 2030?

Lithuania is seeking to install 5.1GW of solar PV capacity by 2030 under its National Energy and Climate Plan (NECP), which was updated last year. European solar trade bodies have previously called for greater cybersecurity strategies as digital infrastructure and data become increasingly important in the development of physical energy resources.

How many solar panels are installed in Lithuania in 2023?

Lithuania had a total of 1,165 MW of installed solar by the end of 2023, according to figures from the International Renewable Energy Agency (IRENA).
