

Solar Storage Container Solutions

Container BESS wholesale in Gothenburg Sweden

Overview

What types of container transports does Bess offer?

Bess has standard and specialized chassis for various types of container transports. The main activity related to these transports is also bulk. We have chassis for transportation and unloading of 20'/30'/40' pressurized tank containers designed for any free-flowing dry bulk material.

What is the biggest container port in Scandinavia?

The biggest container port in Scandinavia is in Gothenburg. Around 57% of Sweden's container trade is handled here, evenly distributed between exports and imports. The wide range of routes includes direct services to North America, North Africa, the Middle East, India, South Korea, China and other parts of Asia.

What is a Bess battery storage system?

A fully EU-made concept for smaller BESS products in Europe. A 500kW / 602kWh battery storage system, fully designed in Sweden, containerized in Gothenburg, and delivered to our client in Örnsköldsvik. The system consists of a fire extinguishing system from Siemens, a Swedish-made EMS, and 42 battery modules of 14.3 kWh.

What is a Bess system?

A complete BESS system consisting of 30 battery modules with a capacity of 375kW-430kWh was designed to achieve stable returns through the various ancillary services available in the Swedish market (Göteborgs Energi & Svenska Kraftnät). In this container, we have used Sinexcel 500 as an inverter.

What services does the port of Gothenburg offer?

Frequent feeder services also operate every day to the major transshipment hubs on the continent. There are a number of operators offering

transshipment, stuffing and stripping, container service and repair amongst other services at the Port of Gothenburg.

What is a 30' bag-in-box container?

These type of tank containers is identical to that of conventional road tankers. We also have a number of chassis for discharging of 30' bag-in-box container. Inside these containers, so-called "inliners" are fixed to the walls and filled with the material to be transported. Unloading here is via a rotary feeder.
