Czech energy storage high power supply wholesale price

Overview

How much does electricity cost in Czechia?

A paid subscription is required for full access. The average wholesale electricity price for the month of April 2025 in Czechia stood at 79.9 euros per megawatt-hour. In August 2022, the country recorded a peak in electricity prices of 477 euros per megawatt-hour. Get notified via email when this statistic is updated. *Provisional figure.

Where does the Czech Republic buy oil & gas?

The country is integrated into regional transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany. The Czech Republic has two nuclear power plants at Dukovany and Temelin, which delivered over 31 TWh of electricity in 2022.

What is the energy sector like in Czech Republic?

The Czech energy sector is largely built around two large nuclear plants and several smaller conventional coal power plants. Nuclear and coal power plants provide primarily baseload power at a high level of utilization, while gas fired units, reservoir hydro and pumped storage provide flexible generation.

What resources does Czechia have?

Czechia has important coal and lignite resources (3.5 Gt in 2022), mainly located in the northern part of the Boheme. Gas and oil reserves are limited (3.3 bcm and 1 Mt in 2022). The hydroelectricity potential is about 13 TWh. The government has approved a price cap for electricity and gas amid soaring energy prices.

Does the Czech Republic produce natural gas?

The Czech Republic has no significant production of natural gas or oil and is fully dependent on imports. The country is integrated into regional

transmission systems and can purchase oil and gas from different countries based on market prices in Rotterdam or elsewhere. Most oil and gas are imported via Germany.

What is the energy mix in the Czech Republic?

The Czech energy mix was made up of 53.60 percent fossil fuels (47.50 percent lignite, 5.86 percent natural gas, etc.), 40.95 percent nuclear power, and 5.46 percent renewables (3.34 percent biomass, 1.47 percent solar, 0.63 percent water, etc.).
