without authorization**

**3354KWH**

**1331.2V 2520AH**

## Overview

---

Read this document and the documents listed in the additional resources section about installation, configuration, and operation of this equipment before you install, configure, operate, or maintain this produ.

Do I have a warranty on my uninterruptible power supply (UPS)?

you at the time of sale. For customers purchasing a new Uninterruptible Power Supply (UPS) from a Reseller, the Limited Warranty of your Uninterruptible Power Supply (UPS) was provided to the Reseller at the time of sale. Please contact Mitsubishi Electric Power Products Inc. immediately if formal documentation of the warranty transfer.

How do I enable/disable the 1609-d ups?

The Power Button on the front of the UPS is used to manually enable or disable the output of the 1609-D UPS. To enable the 1609-D UPS, press and hold the power button until one beep is heard. To disable the 1609-D UPS, press and hold the power button until three beeps are heard, then release immediately (takes approximately three seconds).

How do you connect a ups to a power supply?

Fasten the mounting plate to the rear panel of the UPS with four M4 screws. An external power supply unit is required to supply the UPS with a 24 V DC voltage (-15 % / +20 %). Connect the external power supply unit to the UPS Uin input. Connect the loads to the outputs U1out and U2out.

How do I enable/disable the ups output?

Selected 'DISABLE' for Manual Enable/Disable the UPS Output. Selected 'ENABLE' for Remote Enable/Disable the UPS Output. The Power Button on the front of the UPS is used to manually enable or disable the output of the 1609-D UPS. To enable the 1609-D UPS, press and hold the power button until one beep is heard.

Do I need an external power supply unit?

An external power supply unit is required to supply the UPS with a 24 V DC voltage (-15 % / +20 %). Connect the external power supply unit to the UPS U<sub>in</sub> input. Connect the loads to the outputs U<sub>1out</sub> and U<sub>2out</sub>. Do not wire the UPS and loads during operation and always in the switched-off state.

How to stop a power supply if the unit stops?

The unit is equipped with an output circuit that can supply power to the connected devices even if the unit stops due to a failure or mis-operation of the internal circuit function. If you want to stop the output, stop the source of the “input power supply”. • Output is continuing even when all indicators of the front panel are off.

**Do not connect the uninterruptible power supply without authorization**
