Dublin Communications 5g Base Station Project Bidding Project

Overview

How can Dublin offer equitable access to 5G?

To help offer equitable access to 5G in Dublin, Dublin City Council's Smart Docklands programme has partnered with with Dense Air and CONNECT Research Centre to prototype a ground-breaking neutral host small cell 5G network. A neutral host network is a shared network that is open to all mobile network operators.

Is Dublin City Council launching a new telecoms unit?

Heather Humphries TD, Minister for Rural and Community Development stated, "Dublin City Council's new Telecoms Unit is a very welcome development. For several years DCC, through their Broadband Officer and Smart City programme have played a leading role in trialling and deploying innovative digital technologies.

Does Dublin City Council have a telebelly?

Dublin City Council Launches Small Cell Infrastructure with Telebelly! Dublin, Ireland: This month, Dublin City Council (DCC) launched a new Telecoms Unit to provide a foundation for intelligent urban technology and 5G infrastructure. The new DCC Unit will act "as a 'one stop shop' service to support the delivery of telecoms" in public spaces.

Is Dublin a leader in digital infrastructure?

Dublin as Ireland's capital city needs to position itself as a leader in digital infrastructure to realise its potential and support the connectivity needs of residents, businesses and communities.

Does Dublin City Council have a smart city program?

Prof. Dan Kilper, Director of the CONNECT Research Centre and Professor of Future Communication Networks at Trinity College Dublin commented on the partnership, "Dublin City Council's vision and leadership in its telecoms and

Smart City programs have received global attention.

What is DCC's new telecoms unit?

Dublin City Council (DCC) have launched a new Telecoms Unit to accelerate the rollout of digital infrastructure and 5G deployments across the city. The Unit will offer a 'one stop shop' service to support the delivery of telecoms both underground (ducting) and over ground (supporting mobile and wireless services).
