# Dublin Container Generator

## Overview

---

Where can I buy a generator in Ireland?

Larger petrol or diesel generators are also available for use in areas with no power supply such as building sites and outdoor catering. At Robert Kee Power Equipment, we have a large range of petrol generators for sale in Ireland. We also offer Free Delivery on our suitcase inverter generators and freight delivery on our larger machines.

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Where can I book a stay at generator Dublin?

Book direct on [staygenerator.com](https://staygenerator.com) and receive a 10% further discount on any of our public rates. You'll find Generator Dublin in the hip Smithfield neighbourhood; adjacent to the Jameson Distillery and just a short walk from Temple Bar. Our Dublin hotel features open social spaces and is equipped with a café/restaurant and a bar on-site.

Why should you choose a containerised generator?

**Fire Detection Panels and Intruder Alarms:** Enhanced safety and security. Our containerised generators are suitable for a wide range of applications, including: **Super Silent:** Super silent 65dBA at 1m for prime power running diesel and gas. **Critical Backup Power:** For MOD, NHS, and HMP sites, ensuring reliable performance in emergencies.

Can you put a generator in a container?

Generators can be put into containers. There are a number of benefits to doing this including: Easier transportation and installation making them ideal

for temporary or remote applications. They are more secure as typically they are lockable which prevents unauthorised access. Do I need to service my power system?

Put simply, yes.

What is a diesel generator?

Diesel generators are those that are run on diesel, and can typically be divided into two basic parts: a diesel engine and an electrical generator. Diesel generators can be used to provide power to places that are not powered by a power grid or can be used as a backup in case of a power outage.
