

## Solar Storage Container Solutions

# European Generator Equipment Container

## Overview

---

What is a containerised generator?

Our Containerised Generators deliver robust, high-capacity power from 300–3,000 kVA in secure, weather-resistant enclosures. Designed for challenging environments and critical applications, they offer noise reduction, easy transport, and bespoke configuration to meet your site's exact needs.

Which genset containers are available?

All genset containers are also available with an option for  $-40^{\circ}\text{C}$  and most variants can be upgraded for  $+45^{\circ}\text{C}$ . A broad range of options, both mechanical and electrical, are available to ensure that our containers meet the project requirements. For example, we offer several heat recovery configurations and exhaust after treatment systems.

What is an ISO containerise generator unit?

A 'standard' ISO containerise generator unit denotes an installation where the original lifting points and dimensions of the intermodal container are left unchanged.

Can JPC supply a high power containerised generator unit?

JPC can also supply a high power containerised generator units. Which by widening the ISO container to accommodate a larger generator unit; these larger containerised generator unit can still be lifted into place using standard crane methods with standard locking corner casting positions for road transport.

What is the standard ventilation for genset containers?

The standard ventilation is designed for ambient temperatures from  $-25^{\circ}\text{C}$  to  $+40^{\circ}\text{C}$ . The genset containers can be equipped with several additional features to enable operation at lower temperatures on request. Type 6 containers are available with a similarly broad range of options that we offer

for the Type 2 / 3 / 4 containers.

What is a JP container?

JP Containers provide all of the necessary access points, doors, air flow control and noise control required to ensure the generator can operate safely, securely with minimum impact on the environment for the life of the generator.
