Why did Spain's baseload price drop 46% in 2022?

According to European Commission (2023a), in the fourth quarter of 2022 Spain's average baseload price decreased by 46% compared to where it stood a year ago, a reduction which can be explained based on the significant growth in solar energy production with the addition of 10.8 GW of solar photovoltaic capacity to the grid.

Why are electricity prices so low in Spain?

For household electricity prices, this difference is explained by lower gas prices and the bet on renewable sources of energy. According to Eurostat data, Spain is in line with the European Union in terms of taxes, with 17 percent of the price being VAT and other recoverable taxes and levies.

How did Spain's manufacturing output compare to 2021?

Economic Bulletin 3/2022 According to the industrial production index (IPI),<sup>1</sup> manufacturing output in Spain between January and July 2022 was up 2.9% on the same period in 2021. This figure contrasts with the more modest increases recorded in France and Italy (1.3% and 1.2%, respectively) and the 1.2% decline in Germany (see Chart 1.1).

Why are Spain's manufacturing sub-sectors heterogeneous in 2022?

In sum, the heterogeneous output developments across Spain's manufacturing sub-sectors so far in 2022 could be explained, at least in part, by the differences in terms of energy dependence, exposure to the recovery in contact-intensive activities and the severity of the supply shortages.

Is Spain a buyer's market for PPAs?

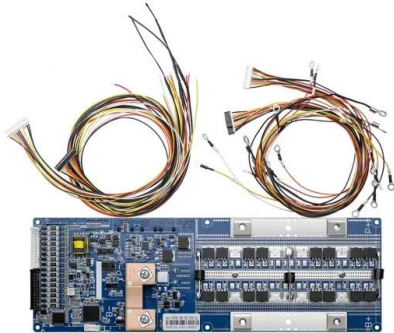

This has been the norm because of the status of Spain as a buyer's market for PPAs, the fact that the country had not recorded any negative price hours before 2024 and that 0 and negative prices were expected to be short-lived

and rare. However, this trend is changing.

Are Spanish day-ahead electricity prices determinants?

The purpose of this study was to investigate the dynamic relationship between Spanish day-ahead electricity prices and some of their fundamental determinants (average surface temperature, forecasted load and RE injection, natural gas and CO2 emission rights price).
