# Finnish energy storage lithium battery manufacturer

## Overview

---

Does Finland have lithium ion batteries?

Finland is one of the few European countries where the ground contains all the key minerals needed to make lithium-ion batteries: cobalt, nickel, lithium and graphite.

What makes Finland a good battery company?

Finland has expertise throughout the battery value chain, from the mining industry and processing of raw materials to technologies and services related to the manufacture and use of batteries, as well as charging technologies and recycling.

Should battery storage be integrated with Finland's growing wind capacity?

Benjamin Kennedy, Ardian's Managing Director for Renewables Infrastructure, emphasized the strategic importance of integrating battery storage with Finland's growing wind capacity to ensure a balanced and efficient energy system.

Where will Neoen's new lithium-ion battery plant be located?

The facility will be located close to Lappeenranta in the south-east of the country. Following on from the Hornsdale Power Reserve in Australia, Azur stockage in France and Albireo Power Reserve in El Salvador, this first roll-out of lithium-ion stationary batteries in Finland underpins Neoen's leadership in battery-based grid services.

Does Ardian invest in battery storage?

Ardian, a leading global private investment house, is financing the project through its Ardian Clean Energy Evergreen Fund, marking the fund's inaugural investment in battery storage technology.

What is Finnish minerals group?

The mission of Finnish Minerals Group is to responsibly maximise the value of Finnish minerals. We manage the State's mining industry shareholdings and strive to develop the Finnish value chain of lithium-ion batteries. Through our work, we contribute to Europe moving towards electric transport and a more sustainable future.
