Generator switchgear for sale in Us

Overview

What is generator switchgear?

Generator switchgear is a system that starts the standby generator and connects it to the load during emergency situations when utility power fails or fluctuates outside acceptable voltage or frequency levels. It synchronizes, parallels, and automatically starts the required number of generator sets to match the size of the load.

Who is American switchgear?

We are a Strategic Sourcing Supplier with offerings from US Based industry manufacturers and Global sources, along with supporting our customers with our Engineering Services expertise. Our tag line is "GREAT AMERICAN SWITCHGEAR". Let us know how we can help you improve reliability on your system!.

What is a Generac transfer switch?

Generac transfer switches make it possible to switch between utility and generator power. Depending upon the application, the transfer switch will either work automatically or manually. * All pricing listed is in US dollars and is intended for our customers within the United States.

What is automatic paralleling switchgear?

Automatic paralleling switchgear is a type of generator switchgear offered by Steiner. It is used in emergency standby, prime power, and energy management situations. When utility power fails or fluctuates outside acceptable voltage or frequency levels, automatic paralleling switchgear starts the standby system and connects it to the load.
