How many mw subsidized battery storage in Greece?

Home » News » Renewables » Greece awards 188.9 MW for subsidized battery storage in final auction Greece's third energy storage auction has been completed, with nine projects selected and a capacity of 188.9 MW.

What is Greece's third energy storage auction?

Greece's third energy storage auction has been completed with nine projects selected. It was the final auction where the state provides subsidies to build battery energy storage systems (BESS). A total of almost 800 MW in capability has been awarded through all three storage auctions.

Why is Greece launching a battery storage auction?

Initially a response to the COVID 19 pandemic, the focus has pivoted to support Greece's green energy transition. The storage auctions themselves require further approval under EU State aid rules. The pipeline of prospective battery storage projects now approaches 27GW, with over 500 projects granted a storage license.

Does Greece have a battery storage pipeline?

Greece has emerged as one of the countries with the largest pipeline of battery storage projects, but as yet there has been little activity on the ground. This is changing as the long-awaited storage subsidy auctions have started, with the first projects being awarded support for both investment and operating costs.

Will Greece provide financial support for 900MW energy storage capacity?

The government in Greece is looking to provide financial support for up to 900MW of energy storage capacity through a tender as previously reported by Energy-Storage.news. The country has an overall energy storage deployment goal of 3GW by 2030 to facilitate a 70% renewable energy target.

How many MW of storage will Greece need by 2030?

The majority of the projects (2,650 MW) belong to Group Γ and will connect to ADMIE as follows per region. A key factor driving companies is that this large capacity will cover all the storage needs Greece will require by 2030.
