Guyana Telecommunication Tower Base Station Construction

Overview

What happened to Guyana telecom monopoly?

The end of the 31-year monopoly held by the fixed-line incumbent Guyana Telephone and Telegraph (GTT) occurred just two months after the PPP took power from the APNU+AFC coalition, which had signed a non-binding agreement with GTT in 2019 to liberalise Guyana's telecoms market but failed to take any concrete action to make it happen.

Does Digicel Guyana have a competitive mobile market?

The mobile market has been open to competition since 2001, but only one operator, Digicel Guyana, has successfully launched competing GSM and 3G services. While Digicel quickly built a small lead in the mobile market, it remains a duopoly, and penetration levels are well below those of other countries in the region.

Can Guyana reach its full potential?

The Telecommunications Act presents the country with the potential to benefit from a more level playing field that may attract new players, but nevertheless Guyana's relatively small size and low GDP may restrict it from reaching its full potential for some more years to come.

Guyana Telecommunication Tower Base Station Construction

Cooling for Mobile Base Stations and Cell Towers

May 5, 2025 · Background Unattended base stations require an intelligent cooling system because of the strain they are exposed to. The sensitive telecom equipment is operating 24/7 ...
