High quality wiring a breaker in France

Overview

Both fuses and breakers in French systems are double pole, this means both live and neutral are isolated in the event of a trip, ratings are the same for both – typically 2, 6, 10, 16, 20 and 32 amps and both are connected into distribution boards in exactly the same way. Does a French breaker need a double pole?

Alcazar Not that it really matters, since all French breakers are double pole, breaking the phase, and neutral feeds, but there is a sort of unwritten rule that says that the live, or phase cable is connected to the right hand side of the socket, as you would see the socket on the wall, ie: from the front.
