Overview

What kind of solar inverter does Sako offer?

SAKO has developed a wide range of products, including off grid inverters, modules, and solar lithium batteries, so that you can find a complete range of solar systems at SAKO. Capacity: 500VA~100KVA Types: Off Grid Solar Inverter & Hybrid Solar Inverter Capacity: 50A~600AH (1.288KWH~500KWH) Rated Voltage: 12.8V~512VDC.

What is a hybrid solar inverter?

The hybrid solar inverter is a multifunctional device that combines solar energy systems, AC power and battery power to continuously power electrical equipment.

What is the output power of anern solar inverter?

The output power of Anern solar inverter ranges from 1.5 to 6.2KW and can be connected to different power loads. Liquid crystal display battery voltage and output voltage and state parameters, is intelligent configuration. Our hybrid solar inverter for sale has overload, over temperature, short circuit protection, etc.

Are hybrid solar inverters suitable for off-grid system?

As one of the leading hybrid solar inverter suppliers in China, Anern has independently developed a variety of hybrid solar inverters with different performances, which is suitable for off-grid system and on-grid system.

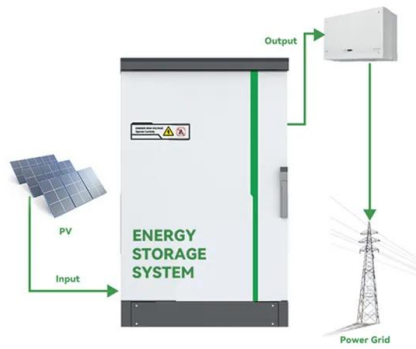

Why should you choose anern hybrid solar inverter?

When the load power consumption is limited, Anern hybrid solar inverter can effectively improve the utilization efficiency of solar energy, especially suitable for the situation of an unstable power grid or high power supply cost. Reliable design, stable even in the most challenging environments. Adapt to mains voltage or generator power.

What is a solar inverter & controller?

Solar Inverters mainly function to convert direct current (battery, DC power supply, etc.) into alternating current. The solar controller is mainly used for charging the storage battery with photovoltaic modules, it can stabilize the voltage during charging and discharging processes to avoid overcharging and device damage.
