How many 5G base stations are there in Brazil

Overview

Does Brazil have 5G?

Since that date, all 5,570 towns and cities in Brazil have been approved for 5G, although actual network deployments vary among operators. Three-and-a-half years after receiving its 5G licenses, Vivo —Brazil's largest mobile operator by subscriptions—can claim the country's most extensive 5G subscription base.

How many 5G base stations are there in Brazil?

A total of 5,275 standalone 5G base stations have been activated in Brazil – double the minimum commitment. This represents 6% of the overall 93,159 base stations in the country. By 2025, 6,370 5G base stations must be installed in the state capitals. In total, the state capitals are home to nearly a quarter of the Brazilian population.

How many 5G base stations are there in China?

In data collected between July 2022 and June 2024, China was reported to have had around 3.5 million 5G base stations installed across the country, with Chinese mobile operators investing heavily in 5G infrastructure. By comparison, the European Union had around 460,000 thousand base stations, while the United States had approximately 175,000.

How many municipalities in Brazil have 5G?

This brings the total number of municipalities with 5G coverage to 3,678, covering approximately 181.3 million Brazilians, or roughly 85 percent of the population. 5G is the fifth-generation technology standard for mobile and broadband networks, succeeding 4G connectivity networks.

Which country has the largest 5G subscription base?

Three-and-a-half years after receiving its 5G licenses, Vivo —Brazil's largest mobile operator by subscriptions—can claim the country's most extensive 5G

subscription base. As of May 2025 (the most recent official data available), there were approximately 19.2 million users connected to its 5G Standalone network.

How many 5G towers will Brazil build in 2029?

Winity says it plans to build 5,000 towers by 2029 and establish itself as Brazil's first wholesale operator. In 2022, standalone (SA) 5G services using the 3.5GHz frequency band have been steadily rolling out in most of the nation's state capitals.
