Continue reading for more. Constructed to lure shoppers and increase commuter traffic, Bloomberg has reported that the ¥65 billion tower is expected to boost developer Tobu Railway Co.'s (9001) revenue by ¥28.3 billion. Approximately 32 million visitors are expected within the first year.

How long did it take to build Tokyo Skytree?

The Tokyo Skytree took four years to construct and is double the height of Japan's 333-meter Tokyo Tower. Tokyo Skytree's name and design concept is described by the developer as, "The creation of city scenery transcending time: A fusion of traditional Japanese beauty and neo-futuristic design". Continue reading for more.

How can Ris improve a base station design?

At SoftBank, we are focusing on the ability of RIS to change the surface phase to strengthen beams in any desired direction. By leveraging this characteristic, we are working to develop simpler base station designs by significantly reducing the number of wireless components, such as phase shifters and amplifiers, within the base station.
