LiFePO4 battery

Overview

What is the electricity price in Iceland?

The residential electricity price in Iceland is ISK 23.263 per kWh or USD 0.191. The electricity price for businesses is ISK 11.680 kWh or USD 0.096. These retail prices were collected in December 2024 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Iceland with 150 other countries.

Does Iceland have a competitive electricity price?

Electricity prices for energy intensive industries in Iceland are relatively competitive at a global level. This is mainly due to the abundant and natural energy sources in Iceland, such as hydro power and geothermal energy. Only a few countries or regions in North America or Europe can benefit from similar energy sources.

What factors drive electricity prices in Iceland?

In this chapter, we outline the electricity supply, demand, market design, and present the main factors driving electricity prices in Iceland. Over decades, there has been a significant growth of the net electricity consumption in Iceland, reaching the level of 19.28 TWh in 2018.

Is Iceland's energy supply good?

Iceland's energy supply is very cost-competitive due to its almost 100% carbon-free electricity generation and high potential of natural energy resources.

How is electricity produced in Iceland?

Based on the United States Energy Information Administration data from 2022, electricity in Iceland is produced from the following sources: fossil fuels 0.00%, wind 0.05%, solar 0.00%, hydro 70.16%, nuclear 0.00%, and geothermal 29.79%. You can also compare the energy mix of Iceland to other countries.

Why are Iceland's energy bills so high?

Residents of Iceland have noticed a steep increase in their power bills since 2020. Iceland has been able to take advantage of the local environment to generate significant amounts of energy from renewable resources.
