How to connect the base station to the battery

Overview

How do I connect a base station?

Base Station Connection and Routing — Fully insert the Power Cable and Interface (I/F) Cable connectors into their respective ports in the underside of the Base Sta-tion. Then connect to an AC Adapter, and plug the AC power cord into the (wall) outlet. Figure 5. Connecting the Base Station.

Do I need a rechargeable battery for my base station?

Only use NiMH Rechargeable Batteries - never insert regular, alkaline batteries into your Base Station! Use the guided flow below for an interactive, step-by-step experience that will help you through the installation process.

How many batteries does the base station take?

The Base Station takes four (4) 1.2V, 1300mAh nickel-metal hydride (NiMH) rechargeable batteries. Regular alkaline batteries should never be inserted into the Base Station, as they may damage the device. Once you have acquired the necessary NiMH rechargeable batteries, you can follow the steps below to replace them:.

How do I attach a DC power cord to a base station?

The DC power cord for the adapter can be secured to the bottom of the base in order to maximize the mechanical retention of the cable itself. The routing of the power cord can be changed to accommodate base station positioning: horizontal, stand or wall mount.
