# Huawei base station communication module

## Overview

---

What is a Huawei base station?

Let's dive into a technical explanation. A base station, also known as an eNodeB (for 4G LTE) or gNodeB (for 5G NR) in Huawei's terminology, is a piece of equipment that facilitates wireless communication between user equipment (UE) like smartphones, tablets, and IoT devices, and the core network of the telecommunications provider.

What systems does Huawei offer?

Huawei provides comprehensive management and control systems, such as Huawei's U2000 or Huawei's Cloud BTS. These systems enable operators to monitor, configure, and manage base stations remotely, ensuring optimal network performance and reliability.

What is a base station antenna system?

**Antenna System:** At the heart of a base station is the antenna system. This system radiates and receives radio frequency (RF) signals to and from mobile devices.

What is a base station Power Supply Unit (PSU)?

**Power Supply Unit (PSU):** This provides the necessary electrical power to operate the base station components. It ensures that all parts of the base station have a consistent and reliable power source. **Backhaul Interface:** This is the connection between the base station and the core network.
