Overview

What kind of generator does Iraq use?

Hotels and restaurants often have their own larger, diesel generators but some individual Iraqi households also use smaller petrol-powered generators. "When the power went out, I went searching for gasoline to fuel our small home generator," Mohammed Basheer, 21, a university student from Basra, says.

Are generators a problem in Iraq?

They use private generators, which are now essential in Iraq. But the huge machines you see on every city block have plenty of drawbacks too. This week, when Iraq experienced an almost-nationwide power outage, the streets of Baghdad and other major cities went dark, with only lights from passing cars illuminating the sidewalks.

Are there power stations in Iraq?

Below is a list of power stations in Iraq. Name . ^ Jump up to: a b c d "Gas- and Oil-Fired Plants in Iraq". Indust Cards. Archived from the original on 19 July 2009. Retrieved 13 March 2014. ^ "Al Shemal thermo-electric power plant". Serbia Construction. Retrieved 13 March 2014. ^ "Khor Al Zubayr OCGT Power Plant". Global Energy Observatory.

Why do Iraqis need generators?

It's something of a vicious circle: Besides causing local pollution, private generators are likely also adding to environmental degradation and climate change, all of which makes Iraqis need them even more. In Baghdad, student al-Ameri recalls how one family was forced to move out after a generator moved in next door.

How much money does Iraq spend on generators?

Previous studies on the generator business in Iraq, which is unregulated,

concluded that locals could be spending over \$4 billion on it annually. It's a lucrative business, with documented links to politicians and militia leaders, the so-called "generator mafia."

How many generators are there in Baghdad?

The private generators he is praising so effusively can be found almost every couple of city blocks in Baghdad and other Iraqi cities. It is estimated there are over 4.5 million of them around the country.
