

## Solar Storage Container Solutions

# Is outdoor power supply safe

## Overview

---

Are outdoor power outlets safe?

Yes, in many ways, outdoor power outlets are just as safe as the ones inside. However, those outlets must be National Electrical Code (NEC)-compliant and include a weatherproof encasing. Still, the outlet is only as safe as the appliance that you plug into it, so be sure those are safe for outdoor use as well.

Can a PVC cable be used outdoors?

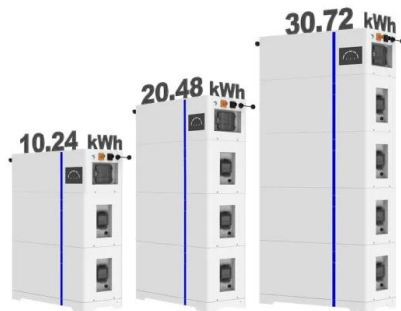

Standard twin and earth PVC cables aren't suitable for permanent use outdoors. The sheath of this cable (grey or white) has limited resistance to UV radiation, but isn't specifically designed for installation in direct sunlight or outdoors.

Should a garden circuit be IP66 protected?

For sockets and switches, IP66 is a prudent minimum. This means they're protected against dust, any possibility of contact and powerful jets of water. Sockets should have integral 30mA RCD protection or be on an RCD/ RCBO protected circuit. It's not recommended to take the garden circuit off an existing circuit through a fused spur.
