Overview

Is electricity reliable in Phnom Penh?

Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh. In very remote rural areas, the only source of electricity may be a small portable generator.

Does Cambodia buy electricity from neighboring countries?

In addition to local power generation, Cambodia also buys electricity from neighboring countries, especially during the dry season. In 2022, Cambodia's total installed capacity amounted to 4,495 megawatts (MW), while 1,030 MW of power was imported from Thailand, Vietnam, and Laos.

Does Cambodia have electricity?

In very remote rural areas, the only source of electricity may be a small portable generator. The Government of Cambodia set a goal of electrifying all villages by 2020 and connecting at least 90 percent of all households to grid-quality electricity by 2030.

How much electricity does Cambodia need in 2024?

Go to Top According to the available electricity demand forecast in Cambodia prepared by the Ministry of Industry, Mines and Energy in 2007 and on the demand forecast by World Bank and KEPCO in 2006, the electricity demand projection in Cambodia in 2024 is 3,045.33 MW and 16,244.61 GWh for capacity and electric energy respectively.

Who owns the electricity in Cambodia?

EdC is co-owned by MIME and the Ministry of Economy and Finance (MEF). Independent Power Producers (IPPs) provide 89% of the electricity produced in Cambodia, and sells it to the EdC. The Public Electricity Utility (PEU) is the owner and operator of state-owned power plants.

Why is electricity so expensive in Cambodia?

Electricity prices in Cambodia are among the most expensive in the region due to a shortage of integrated high-voltage transmission systems and the high cost of imported diesel fuel. Power in provincial cities is more expensive and less reliable than the supply in Phnom Penh.
