

## Solar Storage Container Solutions

# Italian solar water pump

## Overview

---

A solar water pump is a mechanical pump powered by electricity generated using photovoltaic panels. It is popularly referred to as a solar water pumping.

When most of us hear of a solar water pump, we assume it is pretty challenging to use. I can confidently tell you that its usage is pretty straightforward once you.

There are several classifications of solar water pumps that you can choose from depending on your specific needs. The main varieties of solar water pumps.

What is a solar water pump?

Solar water pumps are higher efficiency solutions for many off-grid watering applications. The technology is suited for a range of water needs but is optimized for systems with low flow. Solar pumps are also well suited for areas where other power sources are unavailable or too costly to access.

Who makes solar water pumps?

WBS began producing water pumps in 1998. In 2008, we independently developed and produced solar water pumps. We have OEM production for more than 200 solar pump dealers around the world. Over the past 10 years, we have produced more than 150,000 sets of solar water pumps that have been exported to other parts of the world.
