Kiribati solar lights for rural households

Overview

Is Kiribati embracing solar energy?

Poverty-stricken and energy-poor, the remote South Pacific island nation of Kiribati is embracing solar energy. Is its experience a model or a cautionary tale?

BUARIKI, KIRIBATI — As late as 1990, nightfall in Kiribati (pronounced “Kiribass”), a patchwork of tiny islands in the middle of the Pacific Ocean, was accompanied by a peculiar odor.

Does Kiribati's 25-year solar rollout go smoothly?

But the 25-year solar rollout in Kiribati hasn't always gone smoothly, according to officials and energy consultants.

Is Kiribati a happy country?

“We're so much happier.” Since 1991, the state-owned Kiribati Solar Energy Company (KSEC) has distributed approximately 4,400 home solar systems across 21 of the country's 33 islands and received millions of dollars in development assistance from Japan and then the European Union, according to Tavita Airam, the company's chief executive.

Can Kiribati land on South Tarawa?

When a passenger jet approaches South Tarawa, Kiribati's most populous island, at the end of a three-hour flight from Fiji, one wonders where it can possibly land. That is because most of the island is only a few dozen metres wide — barely enough room, it seems, for a landing strip.

Did Kiribati have a 63 per cent electrification rate?

By that measure, Kiribati, with a 63 per cent electrification rate, looked rather modern. Yet even that rate was less than Britain's (66 per cent) on the eve of the Second World War. WHO'S INSPIRING YOU THROUGH THEIR WORK TO END
