Large capacity explosion-proof lithium battery pack

Overview

What is explosion-proof lithium ion battery?

Explosion-proof battery is a new type lithium ion battery made by materials with high safety coefficient, which can prevent lithium ion battery explosion efficiently. The safety performance is the best merits of this battery. Mining explosion-proof battery has wonderful safety performance and can be charged and discharged for over 1000 times.

Who makes the best custom lithium ion battery pack?

Since its foundation in 2002, Large Power has been dedicated to provide the best custom lithium ion battery pack for worldwide users. And has accumulated rich experience in li ion battery field.

Can lithium battery pack be used in underground coal mining?

In coal mining industry, specifically in underground coal mining, the requirements on lithium battery pack applications are very stringent with various engineering constraints imposed on them, which, in most cases, make the application of lithium technology in such an environment unfeasible or impractical.

What are lithium-ion batteries used for?

Our industry-leading solid-state and low-temperature lithium-ion batteries are widely used in defense, medical, security, communications, railways, petrochemicals, energy storage, and more. Strategic partners include CNPC, China Railway Group, ZTE, Mindray, and others.

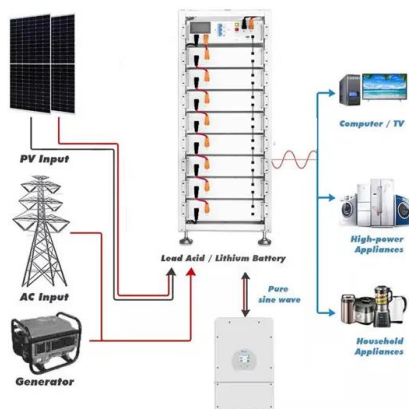

Can lithium batteries be used in mining?

The mining industry has encountered difficulties in deploying large LIB packs (more than 100 kWh) for the underground coal environment, and currently, most battery applications are only in low-power devices with currents drawn in the milli-amperes range .

Are lithium batteries prone to thermal runaway?

Despite the rapid progress in material development and technology for higher-energy-density and safer lithium batteries, current lithium battery technology is still exposed to the risk of thermal runaway, although the probability is relatively low.
