Large single-unit portable power supply

Overview

Can a portable power station be used as an uninterruptible power supply?

Yes, a portable power station can be used as an uninterruptible power supply. Many portable power stations come with UPS features, like automatic switchover when power loss is detected.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

How much does a portable power station cost?

There are a lot of models on the market, and the best portable power stations can handle everything from charging mobile devices and laptops to powering appliances and even EVs. If your needs are simple, you can pick up a good portable power station for around \$150-200. What is the difference between a portable power station and a generator?

.

What can a portable power station charge?

All portable power stations can charge up small gadgets like phones and laptops or be used to power lighting. Most can handle small appliances like mini-fridges or TVs. If you want to use power tools, an AC unit, or in the UK, a kettle, you need to be able to draw thousands of watts.

What devices can a portable power station run?

So long as your portable power station has the right ports and enough capacity, it can run a massive range of devices, including phones, laptops, and

desktops. Higher capacity units will also let you power appliances and charge electric vehicles. Check which ports your preferred model has, including USB Type-A and Type-C, AC and mains sockets.

How many ports does a portable power station have?

You'll find five ports here - a single AC socket, two USB-A and one USB-C ports, and a car outlet. The trade-off for getting a budget portable power station comes from the lower battery capacity, which sits at just 256Wh.
