Lifepo4 power station factory in Portugal

Overview

Will China build a lithium-ion battery factory in Portugal?

Chinese battery manufacturer CALB has confirmed its plans to build a production facility for lithium-ion batteries in Portugal. The factory with an annual capacity of 15 gigawatt-hours is intended to start production in 2028. According to CALB, the investment amounts to two billion euros.

Will CALB build a battery plant in Portugal?

CALB announced on November 3, 2022, that it signed a memorandum of cooperation with the Portuguese government to build its first production site in Europe. The company's battery project in Portugal was planned at an industrial zone near a port in Sines, which is located in the heart of European logistics, a CALB press release said at the time.

Why should Portugal invest in a battery factory?

“Our factory will not only create new jobs but will also place Portugal at the forefront of the production of batteries for electric vehicles in Europe,” he highlights. According to CALB, “this strategic investment” aims to “reinforce its presence in the European market for electric vehicles (EV) and energy storage systems (BESS)”.

Can Portugal build a fully integrated lithium supply chain?

Alongside Spain, Portugal is leveraging its abundant lithium deposits to build a fully integrated supply chain, covering: Strengthening Europe's battery ecosystem by reducing reliance on Chinese manufacturers will enhance supply chain security and create a more resilient local production network for lithium-ion batteries.

How many electric vehicles can a Portuguese plant power?

The first phase of the Portuguese plant has an annual capacity of 15 GWh, enough to power approximately 300,000 electric vehicles (EVs), assuming

each vehicle carries a 50 kWh battery pack, the report noted.

Will Sines contribute to the future of green energy in Portugal?

For the president of the Board of Directors of CALB, Liu Jingyu, quoted in the statement, the project planned for Sines will contribute “to the future of green energy in Portugal” and will support “the transition of the European automotive sector to electric vehicles”
