What is automatic Li-ion battery pack production line?

Automatic Li-ion battery pack production line, is an automated assembly line from cylindrical li-ion cells to semi-finished li-ion battery packs which are ready to connect with BMS. This automatic li-ion battery pack production line incorporates below assembly processes into one.

What is a lithium-ion battery pack?

The Lithium-Ion battery packs at La-Z-Boy have multiple functionalities. Here are some of them in a nutshell. Works with all La-Z-Boy power recliners, sofas, and sectionals (excluding lift chairs). Red flashing light while charging, green steady light when fully charged (approx. 5-7 hours charge time).

What are the advantages of automated battery pack production line?

This automated battery pack production line is highly efficient and it can handle 5000~6000 cells per hour. Moreover, it minimizes the quantity of workers and entire production line only needs 3 standby workers, so it's an ideal solution for those areas with very high labour costs.

What are the technical parameters of intelligent battery pack?

Intelligent battery pack finished product handling and packaging system. 3: Technical Parameters: Total production line length: 16 meters. Production capacity: Up to X battery packs per hour (customizable). Precision level:  $\pm 0.1$ mm positioning accuracy. Processing efficiency: 99.5% uptime.
