How big is the lithium-ion battery market?

And this market isn't slowing down anytime soon— it's projected to grow steadily, reaching around \$88.46 billion by 2033, with a yearly growth rate of 3.4% over the next decade. China has become the center of this lithium-ion battery industry, home to many of the world's top lithium battery manufacturers.

What is trendforce lithium battery research?

TrendForce Lithium Battery Research provides intelligence on market prices and interpretations of market price trends through close and frequent communications with major suppliers, merchandizers, and traders of China's lithium battery supply chain, as well as cross-research and tracking on monthly spot prices for key products of the supply chain.

What is China's Lithium-ion battery industry?

China has become the center of this lithium-ion battery industry, home to many of the world's top lithium battery manufacturers. These companies are leading the way in battery tech, creating everything from compact batteries for light electric vehicles to powerful systems that store renewable energy.

Why is Australia a superpower lithium supplier?

State-level incentives have made Australia a rising global superpower lithium supplier as it's an increasingly prioritized material internally. Increased investment from around the world has led to expansions in lithium mining and production capacity and has solidified Australia as a major supplier to battery manufacturers, specifically to China.

Who makes lithium ion batteries?

Farasis Energy produces lithium-ion batteries for electric vehicles (EVs) and hybrid vehicles, contributing to the electrification of the automotive industry.

Energy Storage Systems (ESS): The company manufactures lithium-ion batteries for energy storage applications, supporting the efficient storage and utilization of renewable energy.

Should lithium batteries be reliant on one supplier?

As policy is changing all of the time, it's good for companies to not be reliant on one supplier for all of their lithium battery supply needs. Trade wars also open the door for emerging territories to enter competition, such as India and Southeast Asia. Policies can also specifically target tech, a highly priced and heavily used consumer good.
