# Lithium battery station cabinet safety signs

## Overview

---

What is a lithium-ion battery charging Safety Cabinet?

Justrite's Lithium-Ion battery Charging Safety Cabinet is engineered to charge and store lithium batteries safely. Made with a proprietary 9-layer ChargeGuard™ system that helps minimize potential losses from fire, smoke, and explosions caused by Lithium batteries. [Shop Now.](#)

Why do you need a battery storage sign?

Our Battery Storage Signs are ideal identifiers and markers for battery storage stations. It is important to mark these areas not just because they can be a potential site for an untoward accident, but also because marking dangerous sites is required by safety laws.

What is a BHS sign & posting kit?

Ensure compliance with regulations, improve safety, notify personnel of hidden dangers, and prevent accidents in the workplace with the BHS Signage and Posting Kit (SP-1), which contains nine signs for display in the battery room. The SP-1 also includes signs to clearly identify the location of emergency equipment for quick response.

What happens if a lithium ion battery is ignited?

Hydrogen Fluoride fumes are emitted when a lithium-ion battery is ignited posing several short-term and chronic threats to people including respiratory and skin irritation, dizziness, headaches, and suffocation as well as a negative environmental impact. Difficult to Extinguish.

Does BHS provide warning signs?

BHS provides Signage and Posting that can be purchased as a kit or individually to ensure compliance. The Occupational Health and Safety Administration states: "Caution signs shall be used only to warn against potential hazards or to caution against unsafe practices."

What happens if a lithium ion battery explodes?

Lithium-ion batteries can generate it's own heat and fuel, explode, have chemical reactions with water, and burn at higher than-typical temperatures that can melt concrete, steel, and water hoses, and can reignite after extinguishing. Gives Little Warning
