Main circuit breaker for sale in Johannesburg

Overview

How much does a circuit breaker cost in South Africa?

Its basic function is to interrupt current flow to protect equipment and to prevent the risk of fire. Circuit Breaker Prices In South Africa?

It can cost between R506.06 and R1686.87 per breaker, while standard circuit breakers are around R168.69 per breaker.

What is a circuit breaker?

Circuit breakers are electrical switches that are designed to protect an electrical circuit from damage caused by overcurrent/overload or short circuit.

What types of circuit breakers does Voltex sell?

Voltex supplies a comprehensive range of locally made and imported brands, including Miniature Circuit Breakers, Motor Circuit Breakers, Moulded Case Circuit Breakers, and Isolators. From compact devices for domestic applications to robust solutions for commercial and industrial settings, we have it all.

How to choose a circuit breaker?

The circuit breaker is selected based on the values of the total leakage current and the rated current. The best electric machines are those in which the maximum switching capacity for devices in the group is 6 kA. The same indicator for terminal devices should be at least 3 kA.

What happens if a circuit breaker breaks?

In the event of a break, the machine loses its supply voltage. In this case, the circuit breaker loses its working capacity. It is possible to provide excellent protection against the current that has gone out of control by mounting separate circuit breakers on each branch that consumes electrical energy and has excellent loads.

What is a differential circuit breaker?

A differential circuit breaker combines the functions of two separate devices: a circuit breaker and an RCD (residual current device). The device is designed to protect against electric shock during human contact with the surface of the equipment or its parts that conduct current.
