Mobile Generator Container

Overview

What is a containerized generator?

Less Maintenance The Containerized Series generator sets are designed for harsh weather and strict acoustical standards, utilizing a standard 40' high cube container equipped with an array of innovative features, allowing the system to operate reliably even in the hottest environments – validated at ambient temperatures of up to 55 degrees Celsius.

What is a genset container?

The definition of a genset container is an engine that drives the generator, which provides the power used to run other equipment. Depending on the application, the genset may run construction equipment, appliances, cooling systems or other devices. Each genset consists of two main components, the generator – or alternator – and the engine.

What are mg containerized gensets?

MG containerized type gensets use advanced sound-absorbing materials, scientific and unique design in airflow and noise control. The container is with CSC certification, in line with international container security convention, ensures shipping directly as a standard container, and greatly saves the cost of transportation.

What size genset container do I Need?

The container is fixed with an inspection door at each side, also equipped with a ladder outside for easy inspection and maintenance. -According to genset dimension, below 1000 KVA, it will use ISO 20'ft GP or HQ container and 40' HQ container for above 1250KVA.

Why should you buy a Cummins containerized generator set?

More Robust. More Control. More Reliability. Factory pre-integrated and customizable per site requirements, the new Cummins Containerized Series

generator sets can provide significantly shortened lead time for installation, and a lower cost of ownership via a flexible design.

What is a safe container?

The container is certified to International Convention for Safe Containers (CSC) and built to last, sporting a fully welded metal construction, steel or wood flooring and stainless steel hardware. Enhanced accessibility and ease of maintenance are realized by combining four conveniently located doors with external fuel ports and removable louvers.
