Are mobile battery energy storage systems a viable alternative to diesel generators?

Mobile battery energy storage systems offer an alternative to diesel generators for temporary off-grid power. Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development.

Can mobile battery storage replace diesel generators?

Mobile battery storage solutions are starting to gain traction and have immense potential to replace diesel generators for off-grid power needs. Recent projections estimated the global temporary power market at \$12 billion in 2021, growing to over US\$20 billion by 2028—a compound annual growth rate of nearly 8%.

Can mobile battery energy storage systems replace dirty generators?

Fortunately, an innovative, cleaner solution is gaining traction to replace dirty generators: mobile battery energy storage systems (mobile BESS). Mobile BESS products provide mobile, temporary electricity wherever and whenever it's needed.

What is a mobile battery system?

Mobile battery systems typically use lithium iron phosphate (LFP) chemistry. They plug into grid or microgrid connections for charging when available, then

disconnect for dispatch onsite. This allows them to provide emission-free electricity anywhere, anytime, without relying on continuous generator operation and diesel delivery.

What can mobile battery systems do for You?

Alex Smith, co-founder and CTO of US-based provider Moxion Power looks at some of the technology's many applications and scopes out its future market development. From construction to disaster relief, mobile battery systems offer a cheaper and cleaner alternative to diesel generators
