# New outdoor power supply in Manchester UK

## Overview

---

What are the different types of outdoor power units?

There are three main units in our range – Pop Up units, Power Bollards and In-ground, also known as Flip lid, all of which provide a range of outdoor power. We offer a range of configurations, as well as bespoke In-ground power units or Pop Up units with recessed tops that can accommodate different forms of surface material such as paving.

Who are pop up power supplies?

UK firm Pop Up Power Supplies provides a wide range of retractable and in-ground service units to provide electricity, water, gas and more, plus power bollards.

Do you need a secure power supply for an outdoor event?

When holding an outdoor event, a secure power supply is vital. Our retractable supply units and In-ground power units are proven to deliver both a constant and efficient power supply, wherever needed.

Are pop up power supplies suitable for mop Fayre's?

Pop Up Power Supplies have a range of service units that are suitable for both rides and stalls at traditional Mop Fayre's. It's been a busy and fulfilling year for us here at Pop Up Power Supplies. Our projects have been diverse to say the least! GET YOUR SKATES ON!.

How do I supply electricity to a garden building?

To provide electricity to an outdoor building, such as a shed, garden office or summer house, you must run an armoured cable from your main house supply to the external building. Ideally, this cable should be buried underground (usually 600mm deep) and connected to a new consumer unit installed in the garden building.

How can I reduce the cost of installing electricity outside?

Doing it yourself can reduce the cost of installing electricity outside. However, we only recommend doing things that don't require the expertise of an electrician. For example, digging a 600mm underground trench from your house to the area where you want power will certainly reduce the cost.
