Who financed a solar power plant in Niger?

The European Union, the French Development Bank and the government of Niger co-financed the installation. A French consortium made up of Akuo and Sagecom has finished building a 30 MW solar power plant in Gorou Banda, Niger. The Niger government had initially planned the project to have a capacity of 50 MW.

What is Niamey's new power plant?

The facility, which is located about 10 kilometers from the capital, Niamey, was developed as part of improving the city's electricity supply under the aegis of the national electricity company, Nigelec. Production will hit 53 GWh in the first year and will be fed into the Nigelec network. The project secured €30 million.

Does Niamey have an electrification rate?

In 2020, Niamey had an electrification rate of 92.95% according to figures from the national statistics institute. However, the city suffers from load shedding, despite the extension of thermal production capacities in 2017.
