Order of Flat-Panel Photovoltaic Tiles for Rural Greece

Overview

How much weight is a solar roof tile?

9.30 Kg. 2,22 – 2,02 uts. The SOLAR FLAT-10 roof tile is designed to blend seamlessly into your roof. Thanks to its integration, it confers all the benefits of capturing renewable photovoltaic solar energy as well as presenting excellent reliability in terms of watertightness throughout the roof.

What is a goodwe solar roof tile?

The GoodWe Sunshine Series is an integrated solar roof tile solution for pitched rooftops to replace traditional solar panels and framework for a sleek, aesthetically-pleasing result, that also maximises your rooftop space for more solar production. The integrated tempered double-glass structure ensures the safety of the roof structure.

Why should you choose a solar roof tile?

Thanks to its integration, it confers all the benefits of capturing renewable photovoltaic solar energy as well as presenting excellent reliability in terms of watertightness throughout the roof. The SOLAR FLAT-10 roof tile is a photovoltaic tile manufactured using the latest photovoltaic cell technology.

Is Greece a good market for solar energy?

Greece become an economically highly attractive market for grid-connected PV systems, given the unique combination of high solar irradiation values and an exceptional feed in tariff. The increasing energy needs of Greece lead inevitably to the development of new methods for the production of energy from renewable sources.

What is solar fat 10 roof tile?

The SOLAR FLAT-10 roof tile is a photovoltaic tile manufactured using the latest photovoltaic cell technology. Denoted by the acronym CIGS* (copper, indium, gallium and selenium), it is the most effective technology when it

comes to operating in the shade.
