

Solar Storage Container Solutions

Outdoor power station factory in Melbourne

Overview

What is a containerised portable power station?

Our Containerised Portable Power Station is a game-changer in providing reliable and sustainable energy solutions for remote and challenging environments. Our innovative design combines efficiency, durability, and adaptability, making it an ideal choice for industries such as mining, construction, and remote site operations.

How long does a portable power station last?

Increase Productivity and Maximise ROI With a Tailored Off-Grid or an Hybrid Power System, That would Pay Itself Back within 2-3 Years. Our Containerised Portable Power Station is a game-changer in providing reliable and sustainable energy solutions for remote and challenging environments.

How will a new battery power plant affect electricity prices?

It will charge when renewable energy is most abundant and discharge when supplies tighten, putting downward pressure on power prices. Its powerful battery units will strengthen the electricity network as ageing coal-fired power stations retire and unlock capacity for more renewable energy.

Do you need a depoist for a portable power station?

We require \$300 depoist when you pick up the portable power station. We suggest paying the \$300 deposit online for convenience and security. Presenting a valid photo ID is a mandatory requirement upon pickup. Otherwise, we will be unable to rent the equipment to you. If you place an order on the same day, please contact us first by email or phone.
