How solar water pumping system works in Bolivia?

Solartech partner in Bolivia installed a solar pumping system for a local farmer. They select Solartech original solar water pump inverter 3.7KW PB-G2 series, which can drive a 2.2KW water pump with a head of 100 meters to pump water from the well to the water tower for water storage.

Who makes smart water pump inverter?

winverter is smart water pump inverter produced by PEModule. PEModule is an Egyptian leading company in Industrial Power Electronics Research and Product Development. it provides its research, design, and manufacturing services to hundreds of factories and universities in the Middle East and North Africa region.

What is a water pump inverter?

It is a completely new inverter for water pumps, and the first residential water pump inverter solution in the Middle East and Africa. With the inverter technology, it Regulates pump speed for longer lifetime, highest and reduced maintenance costs. Over Voltage, Over Current and Over Temperature protection.

How do solar well pumps work?

Revolutionize Your Water Pumping with Sustainable Solar Well Pumps!  
Harness the power of the sun with our high-performance solar-powered deep well pumps. Our advanced MPPT inverters efficiently convert solar energy into electricity, driving the pump's motor to continuously extract water from depths reaching hundreds of meters.

What is a solar well pump used for?

Beyond the listed uses, solar well pumps find application in a multitude of areas, including: Residential water supply: Ensure a steady flow of clean water

for your home. Community water projects: Provide sustainable water access to remote communities. Environmental restoration: Support ecosystem revitalization efforts.

How to choose a solar water pump system?

First, you should confirm whether the solar water pump system is direct feed or with Tank System. You can refer to the below two diagram to calculate the pump head. In practice, we normally choose the pump head 10%-20% higher than the actual demand in order to make sure the pump can work properly.
