How many GW of battery storage contracts are there in Poland?

Poland has concluded its 2028 capacity market auction, awarding around 1.7GW of contracts to battery storage projects.

Does Europe run on Polish lithium-ion batteries?

We are pleased to present our report titled “Europe Runs on Polish Lithium-Ion Batteries: The Potential of the Battery Sector in Poland and the CEE Region”. This report was developed with substantial support from market leaders and stakeholders in Poland and Slovakia.

What is the value of battery exports in Poland?

The value of exports in the battery sector increased 38-fold over the last six years from around PLN 1 billion (EUR 0.21 billion) in 2017 to over PLN 38 billion (EUR 8.24 billion) in 2022. Poland is the leader of the lithium-ion battery supply chain in Europe and will maintain this position until at least 2027.

How much does a lithium-ion battery storage system cost?

Recent industry analysis reveals that lithium-ion battery storage systems now average €300-400 per kilowatt-hour installed, with projections indicating a further 40% cost reduction by 2030. For utility operators and project developers, these economics reshape the fundamental calculations of grid stabilization and peak demand management.

How competitive is the lithium-ion battery industry in Poland?

**Recommendation Developing Competitiveness** The lithium-ion battery industry is now responsible for 2% of the Polish annual export value. This is a datapoint which is often brought up by Polish stakeholders. This shows of course, how much of an economic factor this industry can become.

Is there a shortage of batteries in Poland?

As the market for these batteries continues to grow, it presents significant opportunities not only in Poland, but globally as well. Amidst the ongoing crisis, there is an evident shortage of employees across all sectors. The scarcity of skilled professionals with experience in batteries is a significant concern. The hunt for talent is intense.
