What is a hybrid inverter?

A hybrid inverter can manage energy from multiple sources, such as solar panels, batteries, and the grid, allowing you to store excess energy for later use. Standard inverters, however, only convert solar power for immediate use and do not support battery storage.

What does a solar inverter do?

A solar inverter converts the direct current (DC) electricity generated by your solar panels into alternating current (AC), which can be used by household appliances and fed into the grid. It's an essential component of any solar system, ensuring the energy produced is usable in your home or business. Do I need an Inverter for my solar panel?
