tems covered by IEC 62310-3, rotary UPS covered by IEC 88528-11, and DC UPS covered by IEC 62040-5-3. NOTE 1 This document recognises that continuity of load power to information technology (IT) equipment represents a major UPS application. The UPS output characteristics specified in

What is a high-voltage ups standard?

This standard is essential, since UPSs are, for all intents and purposes, power generators, contain high-voltage elements inside, and, in many cases, can generate high currents depending on their nominal power. This standard defines the immunity and emission limits of electromagnetic disturbances that may affect UPSs.
